Philadelphia, Pa.

August 14, 1895.

Hon. W. M. Aiken,

Supervising Architect,

Treasury Department,

Washington, D. C.

Dear Sir:

Referring to our proposal of July 30th, for furnishing a safe for the Coiners room in the U. S. Mint, Philadelohia, &c., permit us to call your attentio n to our proposal of July 17th, a copy of which we inclose herewith.

x x x x x x x x x x x x x x

In reference to the locks for the six vault doors, our proposal calls for Sargent & Greenleaf #2 Automatic locks, as required in the letter calling for bids, but as verbally stated to you yesterday by the writer, it seems a needless waste of money to put on so expensive locks on such poor doors, especially as you contemplate tearing down the old mint so soon.

I would therefore respectfully suggest that by attaching special #5 Sargent & Greenleaf locks to steel plates, and fastening

-2-

the plates on the inside of the doors, you will secure equal security at much less expense. These locks should be made with shouldered spindles to prevent their being driven in or pulled out.

We will put on six (6) of these locks, in lieu of the #2 Automatic for the sum of \$26.50 each. (\$159.00) Making the total cost of the safe and locks above referred to \$459.00 delivered complete.

x x x x x x x

Trusting that these suggestions may meet with your approval,
I am,

Very respectfully,

Geo. L. Remington,

President.
